**DETAILED ACTION**

**DETAILED ACTION**

***Election/Restrictions***

This application contains claims directed to the following patentably distinct species of the claimed invention:

I. A liquid crystal display device comprising pixel electrodes, in which each pixel electrode contains main face, a first face, a second face, and first to fourth end portions enclosing the main face, wherein the first face is extended along the scanning line, the first end portion is extended along a first scanning line, the third end portion is extended along a second scanning line, the second end portion is extended along a first signal line, and the fourth end portion is extended along a second signal line [claims 1-5, 7-10 and 20-22; Fig.2];

II. A liquid crystal display device comprising pixel electrodes, in which each pixel electrode contains main face, a first face, a second face, and first to fourth end portions enclosing the main face, wherein the first face is extended along the signal line, the first end portion is extended along a first signal line, the third end portion is extended along a second signal line, the second end portion is extended along a first scanning line, and the fourth end portion is extended along a second scanning line [claims 11-19 and 23-25; Fig.9].

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, no claims appear to be generic.

Art Unit: 2871

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mike Qi whose telephone number is (703) 308-6213.

Art Unit: 2871

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
